Patent No. 6027881
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Pavlakis, George N.
APPLICANT: Stauber, Roland H.
APPLICANT: Stauber, Roland H.
APPLICANT: Wournakis, John N.
TITLE OF INVENTION: Mutant Aequorea victoria Fluorescent
TITLE OF INVENTION: Proteins Having Increased Cellular Fluorescence
NUMBER OF SEQUENCES: 37

Sequence 7. Application US/09735487

Patent No. US20020042679A1

GENERAL INFORMATION:

APPLICANT: HERTOGS, Kurt

APPLICANT: POWNELS, Rddi

TITLE OF INVENTION: HIV POSTITIVE BASED ON THE PHENOTYPIC DRUG SENSITIVITY

TITLE OF INVENTION: HIV POSTITIVE BASED ON THE PHENOTYPIC DRUG SENSITIVITY

FILE REFERENCE: 1377-125P

CURRENT APPLICATION NUMBER: US/09/735,487

CURRENT FILING DATE: 1098-07-24

PRIOR FILING DATE: 1998-07-24
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             9

Sequence 11, Application US/09735487

Patent No. US20020042679A1

GENERAL INFORMATION:
APPLICANT: HERTOGS, Kurt
APPLICANT: HERTOGS, Rudi
TITLE OF INVENTION: METHOD OF MANAGING THE CHEMOTHERAPY OF PATIENTS WHO ARE
TITLE OF INVENTION: OF HUMAN HIV STRAINS
FILLS REPERENCE: 1377-125P
CURRENT APPLICATION NUMBER: US/09/735,487

CURRENT FILING DATE: 1098-07-24
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                9
